

Collage Go-Cart

The children's book "Going Places" shows the beauty and fun in being creative and different. Maya and Rafael created a Go-Cart that fits the race environment, you will be using the environment to create your own Go-Cart, with things you can find, such as sticks, leaves, and pebbles.

Inspiration: Going Place by Peter and Paul Reynolds

Medium: Mixed Media

Collaged Go-Cart, Example by the RMG, Mixed Media

STEP 1

With your family, go to your favourite place. It can be a park, beach, or even a trail through a forest. Look around you and find small things that you can use, such as sticks, rocks, sand, and leaves to create your very own Go-Cart.

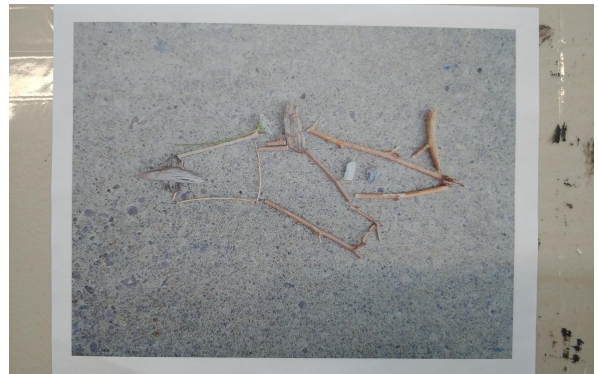

STEP 2

With your collected items, try coming up with different designs for your Go-Cart. Experiment with your materials and try to come up with as many different combinations and designs as you can. Take pictures of all the Go-Carts you made.

STEP 3

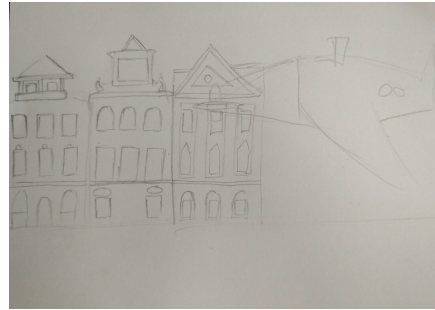

Once you get home, decide on your favourite Go-Cart and print it out. Think of somewhere you would want to drive it around. It could be your favourite place, on your street, or a place from your imagination.

STEP 4

Using printer paper as a background, draw the place you would drive your cart around. Add details, and try to imagine where you would place your Go-Cart on your page.

STEP 5

Using any different coloured or textured paper you have, cut or rip it and collage your page. If you don't have any coloured paper, find some old magazines. You can use images and patterns in there to collage your piece.

STEP 6

Once you have finished your background cut out your Go-Cart and glue it on top of your collage.
